Education

Scaler School of Technology, Bangalore

Aug 2024 – Aug 2028

4 year UG in Computer Science

CGPA: 9.13

Achievements

- ICPC Algoqueen (July 2025) — Global Rank 100.
- Hacktoberfest 2025 (October 2025) — 7 PRS merged.
- Hacktoberfest 2024 (October 2024) — 10 PRS merged.

Experience

InterviewBit | *React, TypeScript, Next.js, Python (FastAPI)*

Nov 2025 – Feb 2026

SDE Intern

Bangalore, Karnataka

- Contributed to AI model training for **OpenAI**, **xAI**, and **Meta** by designing complex application workflows that exposed model limitations and improved reasoning capabilities.
- Built production-grade web applications (Service Desk, Work Management Platform, Customer Support Software) used as training data for frontier AI models.
- Developed pixel-perfect, responsive UIs using React (TypeScript) and Next.js, translating Figma designs into functional interfaces with high fidelity.
- Implemented RESTful backend services with Python and FastAPI, delivering full-stack features with end-to-end ownership.
- Rapidly onboarded to 10+ short-term project teams, consistently delivering quality code in fast-paced, ambiguous environments.

Projects

Gigflow | *GitHub* | *MongoDB, ExpressJS, ReactJS, NodeJS, Socket.IO, Redux Toolkit, JWT*

January 2026

- Created a full-stack marketplace platform enabling real-time bidding between clients and freelancers, featuring JWT-based authentication with HTTP-only cookies, bcrypt encryption, and role-based route protection.
- Developed RESTful API using Express.js and MongoDB with Mongoose ODM, implementing optimized database queries with indexing and atomic transactions for concurrent bid operations.
- Created dynamic React frontend with Redux Toolkit for centralized state management, React Router for navigation, and Tailwind CSS for UI.
- Integrated Socket.io for bi-directional WebSocket communication, delivering instant notifications for bid submissions, hiring updates, and gig status changes.

AiHub | *GitHub* | *React, Node.js, Express, PostgreSQL, Cloudinary*

August 2025

- Built a full-stack AI SaaS platform with 6 AI-powered tools including text-to-image generation (ClipDrop API), long-form article writing, and resume analysis with PDF parsing using Google Gemini 2.0 Flash.
- Implemented AI-powered image manipulation using Cloudinary's generative AI transformations for real-time background removal and intelligent object removal with text prompts.
- Designed RESTful API architecture with JWT-based authentication, and serverless PostgreSQL for persistent storage of user creations.
- Developed a community gallery feature with social interactions (likes, public sharing) and a personalized dashboard displaying creation history with expandable markdown-rendered content.
- Engineered file upload pipeline using Multer memory storage and Streamifier for efficient buffer-to-stream conversion, enabling seamless image processing without disk I/O.

Sugar & Swirl | *GitHub* | *React, Firebase Auth, Tailwind CSS, Vite*

April 2025

- Developed a dessert ordering app with Google OAuth authentication, protected routes, and persistent session management using Firebase Auth and React Firebase Hooks.
- Integrated multi-step ordering fetching 5 product categories from a REST API, with real-time cart state synchronized across pages via React Context.
- Integrated WhatsApp Business API for one-click order submission and EmailJS for customer suggestion forms, enabling seamless user-to-business communication.

Technical Skills

Languages: C++, Java, Python, HTML, CSS, JavaScript, TypeScript

Frameworks: React, React Native, Redux, Node.js, Express.js, Next.js

Databases: MongoDB, MySQL, PostgreSQL, Firebase
